TAFALLA
IRON FOUNDRY

Energy Policy

TAFALLA IRON FOUNDRY, S. COOP. recognizes that fulfilling its mission and objectives must not only focus on the organization's economic benefit but also strive to achieve a balance in social and environmental matters. Therefore, it is firmly committed to the **continuous improvement of its energy performance**, promoting efficiency to contribute to environmental protection through the reduction of greenhouse gas emissions generated by its activities.

TAFALLA IRON FOUNDRY, S. COOP. has equipment, IT tools, and a working methodology that, together with a highly qualified and experienced staff, make it possible to analyze energy consumption and assess optimal usage levels that satisfy the same needs with lower energy consumption – thus achieving significant savings and greater energy efficiency.

The Management of the cooperative is committed to achieving improved energy performance in its facilities by adopting the following commitments:

1. Commit to the continuous improvement of **energy performance.**
2. Promote efficient energy use and energy savings through the implementation of saving techniques within its facilities.
3. Implement and improve technologies to ensure more efficient energy consumption in all operations.
4. Encourage better consumption habits related to energy savings among employees and any external persons using the company's facilities.
5. Promote the use of more efficient technologies wherever possible.
6. In general, protect the environment through the aforementioned actions and contribute to reducing greenhouse gas (GHG) emissions, in alignment with existing local, regional, national, and international policies.
7. Promote the **purchase and design of energy-efficient products** to enhance overall energy performance.
8. Ensure compliance with current legal and other applicable requirements related to energy use, consumption, and efficiency, adapting to any changes in the regulatory framework.
9. Establish measurable and verifiable energy objectives, periodically reviewed, serving as a reference framework for continuous improvement.
10. **Conduct regular energy audits** to identify improvement opportunities and ensure optimal consumption.
11. **Extend our commitments to the supply chain**, encouraging suppliers and contractors to adopt energy efficiency and sustainability practices.
12. **Communicate energy performance results periodically** to employees and stakeholders, reinforcing transparency and trust.
